Description

For example, Homeland series on Lostfilm.tv have the following metadata according to mplayer:

Clip info:

```
major_brand: isom
minor_version: 1
compatible_brands: isom
creation_time: 2013-09-30 15:09:02
media_type: 10
title: Железный дровосек мёртв
artist: Родина
album: Родина, Сезон 3
date: 2013
genre: Drama
comment: Офицер ЦРУ Кэрри Мэтисон подозревает, что вернувшийся из плена сержант морской пехоты Ни
колас Броуди планирует теракт.
copyright: LostFilm.TV (c)
encoder: LostCoder
album_artist: Родина
show: Родина
episode_id: 301
season_number: 3
episode_sort: 1
track: 1
disc: 3
```

Here, only title field seems to be used. Could you please also show at least the artist and (season_number + episode_sort) or episode_id (or both, falling back to another one) if it's not missing?
