

LeechCraft - Bug #1419

Top-level video widget on playback resume

11/10/2013 01:49 PM - 0xd34df00d

Status:	New	Start date:	11/10/2013
Priority:	Normal	Due date:

Category:	Plugins: VLC	Estimated time:	0.00 hour
Target version:			
Reported in:	master		

Description

If a video is to be resumed upon opening the VtyuLC tab, the video widget is occasionally a top-level widget. It is a not-fullscreen, regular widget with a "VLC video player" header.

The issue isn't always reproducible for me, but seems like it happens more often with .mp4 files and from the SSD drive. You could emulate the latter by moving a video file to a tmpfs partition.

Expected result:
A video playback widget inside the VtyuLC tab.

Actual result:
A top-level playback widget without any means to embed it back to the VtyuLC tab.

STR:

0. Ensure that resuming video files is enabled and works.
1. Open a VtyuLC tab.
2. Start playing a video file.
3. Close the tab.
4. Open VtyuLC tab again.
