<b>Category:</b> Plugins: Azoth	<b>Estimated time:</b> 20.00 hours
<b>Target version:</b> 0.6.75	
<b>Description</b> Right now, Azoth Core is responsible for creating QWebViews for the chat windows, and chat style plugins rely on those QWebViews. We shall hide the details of the HTML rendering library (QtWebkit right now) behind an interface and refactor both Azoth Core as well as AdiumStyles and StandardStyles to use said interface, and create their views themselves.
